

EEDUBILLI PREMSAGAR

Full-Stack Developer

eedubillipremsagar@gmail.com · +91 8688024148 · Vizag, India · [linkedin.com/in/eedubilli-premsagar](https://www.linkedin.com/in/eedubilli-premsagar) · github.com/eedubillipremsagar

SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, and Computer Networks. Hands-on experience developing secure full-stack web applications using React.js, Next.js, Node.js, Express.js, MySQL, Redis, Docker, and JWT-based authentication, alongside intermediate knowledge of AWS Serverless technologies (AWS Lambda, API Gateway, DynamoDB, S3, WebSocket APIs, IAM, CloudWatch) and Python-based data analysis using pandas, NumPy, and Matplotlib. Comfortable shipping and hosting projects end-to-end on modern cloud platforms including Vercel, AWS Amplify, and Railway. Passionate about designing scalable software, solving complex problems, and writing clean, maintainable code. A quick learner with strong analytical and collaboration skills, actively seeking Software Development Engineer (SDE) or Full-Stack Developer opportunities to build impactful products.

EDUCATION

B.Tech in Computer Science and Engineering Raghu Engineering College, Dakamarri, Visakhapatnam · GPA 7.5	2024 – 2028
Intermediate in MPC SR Junior College, Gajuwaka · Percentage: 85.7%	2022 – 2024
SSC Yashoda Vidya Niketan, Gajuwaka · Percentage: 90.8%	2021 – 2022

SKILLS

Languages: Python, Java, JavaScript
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, React Router, React Hook Form
Backend: Node.js, Express.js, REST APIs, JWT Authentication, WebSocket APIs, Prisma
Database & Caching: MySQL, Redis
AWS: Lambda, API Gateway, DynamoDB, S3, IAM, CloudWatch
Deployment / Cloud Hosting: Vercel, AWS Amplify, Railway
Data Analysis: pandas, NumPy, Matplotlib
Tools: Git, GitHub, Docker, Postman, VS Code
Soft Skills: analytical, collaboration, quick learner
Spoken Languages: Telugu, English, Hindi

PROJECTS

Full Stack Authentication System

React.js, Node.js, Express.js, MySQL, Redis, Docker, JWT, AWS (S3/Lambda), Tailwind CSS, React Hook Form, Zod, Axios

Developed a production-inspired authentication platform with secure registration, login, logout, email verification, password reset, and protected REST APIs using React.js, Node.js, Express.js, and MySQL. Implemented JWT authentication with Access & Refresh Tokens, refresh token rotation, silent authentication, HttpOnly cookie-based session management, and Redis-backed refresh token blocklisting for secure logout. Integrated Redis for OTP generation, caching, expiration management, email verification, password reset workflows, and temporary data storage to improve performance and scalability. Built robust security features including bcrypt password hashing, authentication middleware, Zod validation, CORS protection, rate limiting, login attempt tracking, and automatic account lockout to defend against brute-force attacks. Designed a responsive frontend using React.js, Tailwind CSS, React Router, React Hook Form, Axios, and React Toastify for a seamless user experience. Dockerized backend services to create a consistent, portable development environment following RESTful API architecture and production-ready engineering practices.

Forge Digital — Agency Portfolio & Service Platform (curate-x)

Next.js, React, Tailwind CSS, Responsive UI, Vercel

Live: <https://curate-x.vercel.app/>

Built and deployed a full-stack-style marketing and service platform for a web design/digital agency, showcasing web design & development, UI/UX, branding, SEO, social media, and e-commerce services under one catalog. Implemented a transparent three-tier pricing structure, a four-stage workflow showcase (Discovery → Design → Build → Delivery), individual service detail pages, and a quote-request contact flow with a promised turnaround time. Built with Next.js and React for fast, SEO-friendly rendering and Tailwind CSS for a clean, fully responsive UI across devices. Deployed and hosted on Vercel with continuous deployment from Git.

TechSpark 2026 — Hackathon & Ideathon Event Platform

React.js, Tailwind CSS, Node.js, Express.js, MySQL, REST APIs, Vercel

Live: <https://tech-spark-zeta.vercel.app/>

Developed a full-stack event platform for TechSpark 2026, a college-level Ideathon, Hackathon, and innovation-challenge event. Built a responsive React.js and Tailwind CSS frontend to present event details, tracks, and registration flows, backed by a Node.js/Express.js REST API with MySQL for storing participant and registration data. Focused on a fast, mobile-friendly UI and a clean information architecture for event discovery and sign-up. Deployed the application on Vercel.

Data Analysis with Python

Python, pandas, NumPy, Matplotlib

Used pandas and NumPy to clean, transform, and analyze structured datasets, applying vectorized operations for efficient computation, and built Matplotlib visualizations to summarize trends and communicate insights clearly.

CERTIFICATIONS & ACHIEVEMENTS

AI Agents — B.J. Swaroop
